Scott, et.al.,

Yes, we should discuss the shower filter assessment idea. I would like to learn more about you believe this will provide tangible information related to adverse health reactions. Friday's are best for me. My only conflict is from 10 am to Noon.

Thanks,

Mark

Subject: Follow Up Testing - I have funds for testing before and after shower filters

Mark / Nancy / Micah,

Thanks again for the call on Friday.

I have some funds for additional testing and believe it would be wise to use them to try and better understand what is in the water pre shower filter and post shower filter.

This is based on repeated feedback the UA370 is getting from residents claiming to get relief from alleged health effects from Flint water for a few weeks after installing filters donated by the UA370.

I am open to all ideas / suggestions as to how to put this money to fund more testing best to work.

It does make sense to have an open collaborative approach on this testing with the EPA involved and present with me and the UA370 when we test.

Also, it would make sense to have a contact at the Office of R&D at the EPA sooner rather than later so I can coordinate with the UA370.

Maybe it would make sense to have a brief call later this week to discuss this?

Best Regards,

Scott Smith
